- In 3Q 2026, Sesa achieved a solid double digit organic growth, with consolidated revenues of Eu 1,104.8 (+10.5% Y/Y), mainly driven by Green VAS (Eu 97.3 mn, +12.1% Y/Y), fully organic and supported by rising energy business demand, digitalization and AI adoption, and by Business Services (Eu 46.2 mn, +12.6% Y/Y), fully organic and sustained by Financial Services digital platforms and vertical applications. ICT VAS recorded a great growth (Eu 757.2 mn, up 14.4% Y/Y), supported by strong Y/Y performance, while SSI (Eu 242.5 mn, +0.3% Y/Y) delivered a resilient performance despite weaker demand in some Made in Italy districts and the re-engineering of certain Business Units.
- In 3Q 2026, consolidated EBITDA increased by 11.6% Y/Y, with EBITDA margin stable at 6.9%, mainly driven by VAS (both Green and ICT) and Business Services, while SSI reported a slight increase (+3.5% Y/Y) thanks to a progressive efficiency recovery Quarter by Quarter. By sector, ICT VAS generated EBITDA for Eu 33.6 mn (+22.2% Y/Y) with a margin of 4.4% (vs 4.2% Y/Y); Green VAS reached Eu 6.9 mn (+10.7% Y/Y) with a margin of 7.1%; SSI recorded Eu 28.2 mn (+3.5% Y/Y) with a margin of 11.6% (compared to 11.3% Y/Y), reflecting operations re-engineering, while Business Services delivered Eu 8.0 mn up 11.8% Y/Y with a 17.2% Ebitda margin.
- In 3Q 2026 Group Adjusted Net Profit amounted to Eu 36.6 mn, up 10.4% Y/Y, driven by higher operating profitability and lower financial expenses and in particular by the positive trend of ICT VAS (+41.4% Y/Y), Green VAS (+15% Y/Y) and Business Services (+26% Y/Y).

- In 3Q 2026, net financial charges decreased to Eu 8.3 mn, showing a significant improvement compared to Eu 10.4 mn in 3Q 2025 (down 19.9% Y/Y). This result confirms the ongoing recovery trend, supported by declining market interest rates and the efficiency measures introduced in FY25.
- Foreign exchange gains equal to Eu 0.2 mn in 3Q 2026, reflecting a stabilization in EUR/USD volatility and confirming the historical trend of more limited impacts. The higher FX loss in 4Q 2025 therefore appears to be a temporary deviation from the historical pattern.
- Looking ahead, net financial charges are expected to continue improving throughout FY 2026, benefitting from the more favourable interest rate environment and the full effect of cost optimization initiatives.
